stacker doors

# stacker doors

Our stacker doors have been designed to create a generous, wide opening that makes the most of your views. The door panels slide behind one another to maximise the space and integrate your indoor and outdoor areas.

Our multi-layered track system accommodates up to 4 doors (sliding in one direction) or up to 8 doors (opening in the middle and sliding in both directions).

## Flow-through sill available

Our stacker doors can be supplied with a beautiful flush threshold to create a seamless transition between indoors and outdoors with no change in level. A variety of other sill options are also available to suit your project (timber threshold included as std).

### Timber Choices

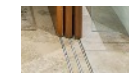

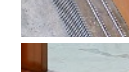

-  Western Red Cedar
-  KD Hardwood
-  Other timbers on request

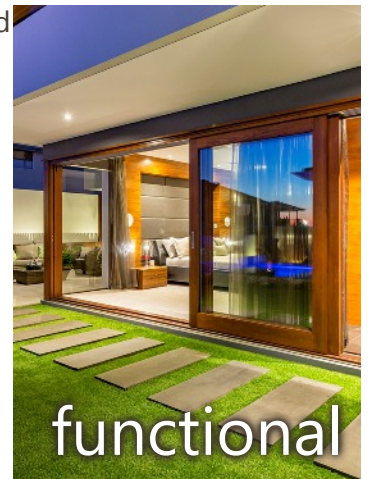

### Profile Options

-  Ogee (standard)  
Max glass thickness 6.38mm
-  Jays (traditional)  
Max glass thickness 10.38mm
-  Heritage (traditional)  
Suits double-glaze, max glass thickness 16mm
-  Square Edge (modern)  
Suitable for single or double glazing

### Threshold Options

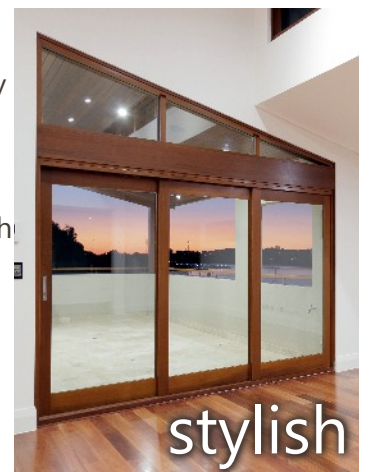

Other options also available.

-  Flush threshold  
(tiles and drainage fitted by builder)
-  Flush threshold  
(tiles and strip drain fitted by builder)
-  Timber threshold  
(standard hardwood sill)

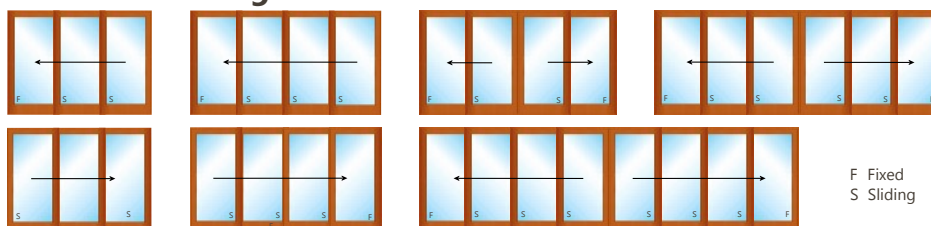

## Data & Specifications

- Custom-made from 100% solid timber to suit your size requirements.
- Premium quality clear anodised track system with full interlock for security and weathersealing. Double-gantry rollers are rebated into the base of each door panel to provide smooth, easy operation.
- Timber threshold (with raised hardwood sill) included as standard. Flush threshold designs also available (ideal for tile or timber inserts). Note: flush sills are weather resistant only (not recommended with timber floors).
- Drainage - track includes linear drainage with extruded aluminium sill to provide positive drainage. Custom sill designs also available on request.
- Maximum size of each door leaf: 3000mm (h) x 1800mm (w).
- Suitable for up to 4 doors (sliding to one side) or 4, 6 or 8 doors (opening in middle and sliding both ways). Door stiles overlap to maximise view\*.
- Option to have fixed glass panel at end (instead of standard door frame).
- Retractable flyscreens available (S1E by Centor). Max size: single 2700mm (h) x 3900mm (w) or double 2700mm (h) x 7600mm (w).
- Available in raw timber or factory primed in white or grey.
- Recessed stainless steel handle with integrated lock as standard.
- \* Customised hardware available, but note handles that protrude more than 10mm will prevent door panels from overlapping.

## Detailed Drawings

Available in a range of configurations including (but not limited to) the above

## Specify this Product

Include

**Cedar West Solid Timber Stacker Door with optional flush threshold**

in your specification. View our website for further details: [cedarwest.com.au/stacker-doors](http://cedarwest.com.au/stacker-doors)
